Introduction

One of the most common problems in society is Mental Depression,
These are those extraordinary times, where accessibility is the Key; it is not just about keeping our hands clean. It is also equivalently essential to keep our mind clean as well as .iabout mental depression as a problem.

Problem Statement

The common cold of mental disorders is depression — most people will be affected by depression in their lives either directly or indirectly, It is considered as one of the biggest problems that have ever been witnessed by the humanity and especially during these covid times where mental depression is on an all-time high.

" Census say that nearly 60% of the teenagers go through the same problem of mental depression. There are cases where it costed lives.**"**

Solution

A device that could analyse a person's mental depression in real-time, and also that could be utilised by the consumer remotely by getting access to superior Therapists on a platform.
And also help the practitioners to access the data of the patient, which allows them to precisely analyse the intensity of depression that the patient is undergoing and prescribe the right amount of medication.

The physical build of the product consists of diodes that could capture the temperature and potential. patterns of the patient

The device has the structure of a physical headband. which can be replaced to a classic reading glasses where the diodes come in contact with the temporal lobes and analyse the heat and mental depression patterns in realtime

During a regular physiotherapist session in a conversation, it is hard for the practitioner to pinpoint the intensity of mental depression.
